

# NEOexpress

NEOexpress is a data-visualisation tool to create, share and run reports from public data-sets hosted by IES. Data includes the full history of the Australian NEM and gas data (STTM, DWGM, GSH, GasBB), Western Australian SWIS, the Philippines WESM data, Australian weather data provided by the Bureau of Meteorology (BOM), and others.

## FULL HISTORY

Access to full history of Australian NEM and gas data.

## EXTENSIVE DATA SOURCES

Access to data for Australian NEM, STTM, DWGM, BOM, WESM, etc.

## FASTER REPORTS

Reports run faster including bid reports using Bid Accelerator

## REAL-TIME DATA UPDATES

Reports update within seconds of data being published

- ✓ Access to IES extensive library of reports and variables
- ✓ Included support and new report requests – tell us what you want and within reason we create it for you free of charge
- ✓ Available schemas: MMS, VICGAS, STTM, GSH, IMOWA, GASBB, BOM temperature, wind
- ✓ Unlimited installs, license count based on number used at the same time

- ✓ Build your own favourites
- ✓ No need to set up and maintain database
- ✓ No database drivers required
- ✓ Perform batch runs
- ✓ Optionally add NEOexpress service as a workspace to NEO to get access to your own reports and data and ours.

# NEOexpress

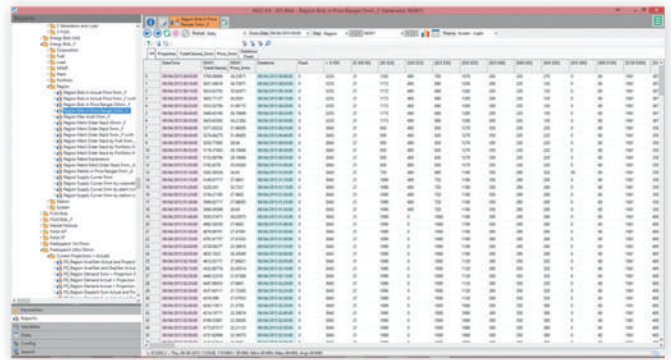

NEOexpress is great for companies that don't have the market data (e.g. MMS Australian NEM data) installed and it's much cheaper than the alternative which could easily cost in excess of \$150K and up to six months to get installed with \$50K+ annual costs.

With NEOexpress, you only need to install the client software, login with your details, and then simply use the provided standard reports that we have created for you. We also provide support to create new reports on request subject to conditions that they can be included in the standard sets and is of general use to other users.

NEOexpress is also a great option for NEO users. With a NEOexpress account you can access your own data and reports plus ours! It also gives you access to our library of 1000's of reports which as a current licensee you are free to copy to your own servers.
