

Analysis and Reporting on the web

Contact us for
FREE TRIAL

NEOpoint provides access to a complete yet tailored collection of reports, in graph and table form, that spans the **full history of energy market data**.

Data service

Use your third party tools like Excel, Matlab, R, Python to get data from NEOpoint

Alerts & mobile App

Set up alerts to receive email or mobile app notifications

Quick Access

Requires no installation, simple web browser login

Auto update

All reports update automatically within seconds of new data being available

Historical Data

Access to the full history of energy market data, includes NEM, STTM, VicGas, BOM, etc.

Fast Analysis

All reports run on performance optimized machines and databases to return data quickly. Bid reports are particularly fast.

Create Slideshows

You can create a slideshow of multiple pages or multiple reports on the same page sliding at a given interval.

Access Nx Favourites

You can also access your own personal NEOexpress favourites from NEOpoint.

Share your reports

You can share reports or results run by you with others by emailing unique URLs.

Reports library

You get full access to 100's of reports and favourites in the IES standard library

Different Views

When you run a report, data is returned as charts or tables. You also have the option to download it as a CSV file.

Special Feature

Other toolbar options allows you to freeze a chart with another chart, to compare different reports or at different time.

History log

NEOpoint maintains full history of reports run by you, so you can visit them later at any time.

Responsive design

NEOpoint can be used on any device or browser.
